

David Gold

David Gold serves as the lead Partner for Clean Technology investments. He earned a Bachelor of Science degree in Mechanical Engineering with Special Honors from the University of Colorado and was a National Science Foundation Fellow while earning Masters Degrees in both Aerospace Engineering and Technology Policy from M.I.T.

After working as an engineer with NASA, Mr. Gold spent a short time working on Capital Hill and served in the Executive Office of the President of the United States where he was responsible for budget and policy oversight of the U.S. Land Remote Sensing and Weather Satellite programs as well as the National Institute of Standards and Technology. Subsequently he worked for several years as a manager growing a network of manufacturing consulting centers that assisted smaller manufacturers implement improved quality and efficiency. As part of his role, Mr. Gold launched an initiative focused on green manufacturing through waste reduction.

Prior to joining Access Venture Partners, Mr. Gold was founder and CEO of ProSavvy, an eProcurement and online marketplace company which grew to profitability and a merger. After ProSavvy, Mr. Gold spent a number of years working with early stage companies as an advisor, board member and part time executive before joining the Access team.
